

About Norton

Norton Gold Fields Limited (ASX: NGF) is an established mid-tier gold producer.

In the six months ended 30 June 2013, Norton produced 85,517 ounces of gold from its open cut and underground operations at Paddington, near Kalgoorlie in Western Australia.

Norton's growth will come from optimising existing operations and acquiring and developing resources.

Dianmin Chen

Managing Director

& Chief Executive Officer

Norton Gold Fields Ltd (ASX: NGF) is pleased to announce it has entered into a gold hedging program with Macquarie Bank Limited comprising 50,000 ounces of gold for delivery over the next 12 months. The flat forward price achieved is A\$1,601.40 per ounce, A\$590 - \$630 per ounce more than C1 Cash Cost guidance (see ASX announcement dated 25 July 2013).

The implementation of a modest short term hedging program takes advantage of today's strong AUD gold price and secures a portion of cash flow. The hedged amount represents approximately 30% of the projected 2013 Production Guidance.

Norton's Chief Executive Officer, Dr Dianmin Chen said, "Norton is very pleased by the pricing that was achieved upon execution of the hedging facility. Hedging a component of our future gold production provides various benefits, including cash flow certainty, and enables Norton to continue to actively invest in further growth".
